Y12

General Service Drive-On Lift

AWARD
WINNING
DESIGN

Maximize speed, performance and reliability!

UP TO 50% FASTER LIFTING SPEEDS THAN COMPARABLE LIFTS

The Y-Lift maximizes rise speed based on the weight of the vehicle - *up to 50 percent faster than a scissor and four-post lifts with the same 12,000 lb. capacity!* The faster rise time means technicians using a Y-Lift can complete service quicker.

Increase productivity and add dollars to your bottom line!

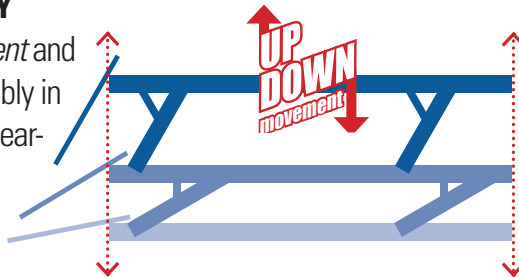

WORK FASTER, EASIER WITH 20% MORE WORK SPACE

The Y-Lift's open design eliminates the restrictive scissor arms and corner posts common to other styles of lifts, so technicians have more room to work. Gain full vehicle access from side-to-side and front-to-rear for the technician.

True up and down movement!

IMPROVED SHOP PRODUCTIVITY

The Y-Lift offers *true vertical movement* and a compact footprint that fits comfortably in smaller bays. There is no forward or rearward movement reducing bay space.

PRODUCTIVITY OPTIONS:

- Can be flush mounted or recessed.
- Single phase 208/230v (3 phase available)
- Extended ramps - 14" longer than standard
- Rolling jacks for wheel free service
- Lighting Kit
- Bolt-On Alignment Kit

Y12 SPECIFICATIONS

Model:	YA12-L	YA12-EL1
Capacity	12,000 lb.	
Rise	68-3/16"	
Overall Length	260"	270"
Overall Width	88"	
Length of Runways	202"	212"
Max. Wheelbase	179-1/2"	189-1/2"
