Standard Features and Benefits

Engineered for Productivity
For decades, Rotary® has been the recognized leader in vehicle service lifts. This legendary reputation has set the standard for quality, durability, reliability and attention to safety throughout the automotive service market.

Service and Support
Our sales force attends intensive training on our products and the issues that face service repair facilities. Rotary representatives can help you evaluate which lift best meets your needs. With a world-wide network of highly-trained Rotary Authorized Installers and Distributors, service support is always close at hand.

- 1/2” steel cable for greater lifting capacity
- Non-skid surface allows sure grip of tires and a “sure foot” for technicians standing on the lift.
- Filter/regulator/lubricator for clean, lubricated air which will extend the life of your lift and air powered tools.
- 5/16” thick (SM014) steel one-piece runway with non-welded track that is part of the runway for strength and durability.
- The power unit is located in the front of the lift allowing us to place the latch air release on the same column. This allows the technician to work more efficiently in the bay and have better access to the controls. The universal bracket allows mounting on the front or the side of the column.
- Unlike most other lifts, Rotary® power units are designed, built and tested by Rotary, for Rotary lifts.

**Lift Safety Standards**
A majority of our general service four-post lifts are third party tested by ETL and certified by ALI to meet or exceed strict ANSI standards such as 1.5 times rated capacity load test, engagement lock test, cable cut and deformation tests. Be sure the lift you buy has the gold ALI/ETL label that assures your lift has been tested to meet these standards.

Redesigned one piece runways to handle higher capacity vehicles and longer wheelbases up to 212 1/2”.

Adjustable latch bars ensure the runways are level when resting on the latch bars at any of the multiple locking positions.

A dual function Sentinel Lock™ system features a patented (U.S. Patent No. 6,446,757) slack cable guide arm that stays “on guard” to manage the lock latch. In a slack cable situation, the lock system kicks the lock into position. Fewer parts means less opportunity for service issues and more peace of mind.

Automatic ramp chocks engage when the lift is raised. Clearance holes allow the ramp chocks to clear runways bolts with less noise on vehicle approach.

Rotary works directly with you, your local distributor, equipment program managers and architects to develop an efficient and capable service area to fit your needs. Our assistPRO™ service provides:
- Product selection and analysis
- Vehicle turning radius and traffic flow analysis

- Customized layout for each facility with final drawings in the format of your choice
- Detailed CAD blocks available to architects
- CSI three-part written specifications
- Continuing education for architects

Look for us in ARCAT’s Spec Wizard.
Optional Accessories

**Rolling Jacks**
Increase your service opportunities by lifting front, rear or all wheels off the runways for brake, tire, suspension and two or four-wheel alignment work.

Rotary Rolling Jacks Feature:
- Hydraulic operation with 2 locking positions
- Drop in rubber adapters made with high durometer rubber. Sizes: 1 1/2” (38mm) and 3” (76mm)
- Easy glide wheels roll smoothly in the track. A sweeper pushes debris away from the wheel.

**Swing Air Jacks**
Swing air jacks add versatility and utility to your lifts enabling technicians to do a wider variety of service work at their current locations.

**Standard/Optional Features**

Four-Wheel Alignment Kit
Convert your general service four-post lift into an alignment lift that is compatible with the new technology 3-D alignment equipment on the market today. Comes with stainless steel turning radius gauges.

Oil Drain Pan
Low profile rolling drain pans with splash guard, drain valve and dust cap. An eight foot oil drain hose with quick connect fitting is also available.

Internal Airline
Internal airline connections let two rolling jacks operate simultaneously, and provides air outlet on the runway.

Alignment Racks
- 14,000 lbs. capacity
- Includes two 7,000 lbs. capacity rolling jacks and an internal airline for organized, efficient operation
- Open front design available
- Air filter/regulator/lubricator keeps your air clean and regulated to extend the life of your air tools
- Recessed 45° turning radius gauges (4,500 lbs. capacity each) are made of 304 stainless steel for corrosion resistance
- Recessed 4-wheel steer slip plates
- Three wheelbase length options

Ramp Kits
- Allows for drive-thru capability
- Oil resistant, non-skid coating
- Includes two ramps and hardware
- Extended length also available

Removable Work Steps
Fits all four-post lifts. Support lugs bolt to runways (drilling and tapping required).

Additional Four-Post Lift Models

Revolution® brand four-post lifts are your source for residential storage and maintenance.

Professional grade lifts built by Rotary - specifically designed for the home enthusiast.

- Storage - Double your garage parking capacity
- Versatility - Store almost anything including lawn mowers, boats, bicycles etc. on top to make more room in your garage
- Two wheelbase options available

Revolution® brand four-post lifts

- Storage - Double your garage parking capacity
- Versatility - Store almost anything including lawn mowers, boats, bicycles etc. on top to make more room in your garage
- Two wheelbase options available

Heavy-Duty Four-Post Lifts
Rotary® Heavy-Duty Four-Post lifts are a great value and an investment that is easy to own and operate because they are engineered to perform and built to last. Our heavy-duty lifts accommodate a wide range of vehicles, making routine vehicle service and maintenance with a Rotary four-post lift just the ticket.

Take advantage of the quick set-up for undercarriage repairs and wheel service maintenance. These four-post lifts are proven, durable and require little to no maintenance. (Available capacities: 18,000, 30,000, 40,000, 50,000 and 60,000 lbs.)
