

WORK LIGHT OF THE FUTURE

TECH LIGHT

Lighting the industry one bay at a time.

Tech Light solves your shop's problems by giving you the amount of light you need, exactly where you need it. Other work lights can cost you a ton in electricity, leaving cords strung out in the work place, and can even be dangerous if touched. Not Tech Light.

We offer three systems to fit your shop's needs.

LINE LIGHT ^R

The LINE LIGHT R is a rechargeable LED inspection hand lamp. Its ultra slim one inch diameter and top spotlight makes it easy to reach those compact areas. The supplied clip holder has both a hook and powerful magnets to help position your tech light for hands free use.

LINE LIGHT ²

The LINE LIGHT 2 is perfect for Two-Post Lifts. Each LINE LIGHT 2 is thirty-four inches long and packed with ninety-six LEDs. Both lights have a spiral cord that stretches more than 16 feet.

The lights are easy to mount, with the four magnetic mounting clips.

LINE LIGHT ⁴

Four post lift lights...you can't beat the LINE LIGHT 4. The LINE LIGHT 4 features four rigid light wands that can attach to a runway with eight magnetic mounting clips. The LINE LIGHT 4 kit contains more than six-hundred LEDs.

WORK LIGHT OF THE FUTURE
Lighting the industry one bay at a time
